ENVIRONMENTAL POLICY

As Freyssinet Azerbaijan, we aim to use our resources effectively, determine our environmental aspects and produce solutions to reduce our impact.

For this purpose, we:

- Support the development of Environmental Culture,
- aim to reduce waste at its source and use energy efficiently,
- Aim to reduce waste at its source and use energy efficiently by controlling the environmental impact and aspects of our activities,
- Struggle against climate change and work to reduce our carbon footprint,
- Contribute to reducing the carbon footprint of our customers with our sustainable technologies,
- Comply with relevant legal regulations and other requirements,
- Conduct training programs to improve the competencies and awareness of our employees,
- Monitor our environmental performance and aim at continuous improvement with a proactive approach.

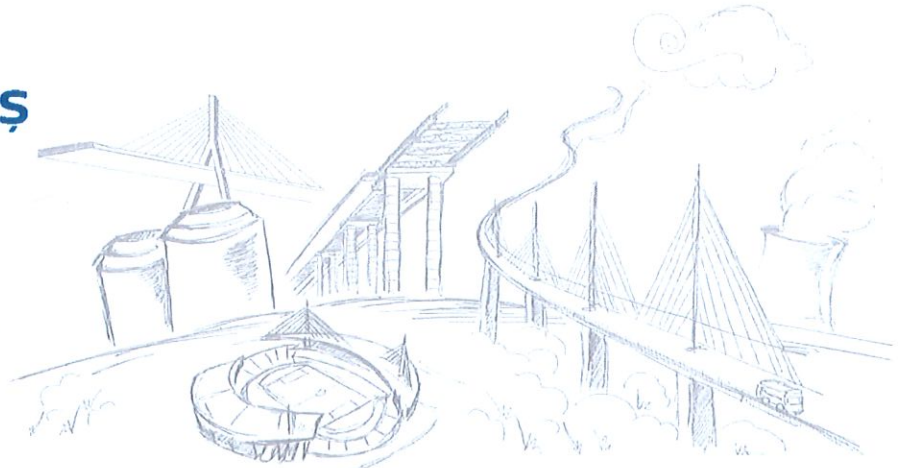

We apply Freyssinet "Golden Rules of Environment" without compromising and focus on reducing our total "Carbon Footprint".

“A sustainable environment for a livable future...”
